Profile

UI/UX Designer with experience designing digital interfaces grounded in user needs, usability, and design consistency. Skilled in running end-to-end design processes — from user research, user flow, and wireframing to prototyping and design systems — while collaborating cross-functionally with Product Owners and Developers. Currently contributing to digital banking product development, with a focus on measurable improvements to user experience.

Work Experience

BPD Bank Sumsel Babel – *UI/UX Designer* Juli 2025 – Present

- Conducted user research (interviews & surveys) to identify user needs and behavior as a foundation for digital product development.
- Designed modern, consistent, and easy-to-use user interfaces based on usability principles for web and mobile applications.
- Developed user flows, wireframes, high-fidelity prototypes, and design systems that became component standards across several internal projects.
- Conducted usability testing and translated evaluation results into design improvement recommendations, implemented together with the development team.
- Collaborated with Product Owners and Developers to ensure design implementation aligned with business and user needs.
- Contributed to the development of various internal systems and digital applications at Bank Sumsel Babel

Urbanview Hotel Bari Syariah Palembang – *Front Office* July 2020 – July 2025

- Handled guest check-in/check-out and managed reservations through online platforms and in person.
- Produced social media content and supported the hotel's digital marketing activities.
- Coordinated cross-functionally with the Housekeeping team to ensure smooth operations and guest satisfaction.

Education

Universitas Muhammadiyah Palembang – *(S.Kom)* October 2018 – November 2022

- Bachelor of Computer Science
- GPA: 3.51

Competitions, Skills & Tools
